THIS WHITEPAPER IS NOT A PROSPECTUS NOR CONSTITUTE FINANCIAL OR INVESTMENT ADVICE. This document does not constitute not imply a prospectus of any sort. No wording contained herein should be construed as a solicitation for investment. Accordingly, this whitepaper does not pertain in any way to an offering of securities in any jurisdiction worldwide whatsoever. Rather, this whitepaper constitutes a technical description of the functionality of BlackbitMart products and the development and distribution of BlackbitMart.

THIS WHITEPAPER IS NOT INVESTMENT ADVICE. This whitepaper does not constitute nor implies investment advice, financial advice, trading advice or recommendation by BlackbitMart, its affiliates, or its respective officers, directors, managers, agents, advisors, or consultants on the merits of purchasing tokens, nor should it be relied upon in connection with any other contract or purchasing decision by anyone

FORWARD-LOOKING STATEMENTS: All statements contained herein other than statements of historical facts are forward-looking statements within the meaning of the “safe harbour” provision of the Private Securities Litigation Reform Act of 1995. We have attempted to identify any forward-looking statements by using words such as “anticipates”, “aims”, “will”, “plans”, “believes”, “could”, “expects”, “intends”, “may”, “should” and other similar expressions. These statements are based upon our current expectations and speak only as of the date hereof. Although we believe that the expectations reflected in our forwardlooking statements are reasonable, we cannot guarantee that such expectations will prove correct. Such statements are not guarantees of future performance or events and are subject to known and unknown risks and uncertainties that could cause our actual results, events or financial position to differ materially and adversely from those expressed in such forward-looking statements. Such factors include, but are not limited to, our ability to raise additional capital, the absence of any operating history or revenue, our ability to attract and retain qualified personnel, our dependence on third-party developers whom we can not control, our ability to develop and introduce a new service to the market promptly, market acceptance of our services, the ability to successfully develop licensing programs and generate business, rapid technological change in relevant markets, unexpected.

Disclaimer

network interruptions or security breaches, changes in demand for current and future intellectual property rights, legislative, regulatory and competitive developments addressing licensing and enforcement of patents and intellectual property, intense competition with larger companies, general economic conditions, and other factors. We undertake no obligation to revise or update any forward-looking statements for any reason. THIS DOCUMENT MAKES NO REPRESENTATIONS OR WARRANTIES.

Introduction

Crypto is about giving you greater choice, independence, and opportunity. We are here to help you on your journey.

Cryptocurrencies are digital cash designed to be faster, inexpensive and more reliable than our systematic government issued currency. Instead of trusting a government to create your money and banks to pile, send and receive it, users transact directly with each other and store their money themselves. Because when people can send money directly without a middleman, transactions are usually very affordable and fast.

BlackBit Mart is a leading and popular cryptocurrency exchange based in Geneva, Switzerland. It offers trading in popular cryptocurrency pairs such as Bitcoin, Ethereum, USDT. It also features a professional-grade charting platform and blocks trades for better, more sophisticated traders' rates. Black bit Mart's security features include storing customer assets in cold wallets, working with information security firms, and two-factor authentication for users.

Since launching the virtual currency trading service "Black bit Mart" in August 2014, Black bit Mart has been an opportunity to feel "new value exchange" closer by providing a easy service for anyone to use regardless of financial literacy. Has been delivered to customers. Cryptocurrencies and blockchains are evolving day by day, and more individual-centered "new value exchanges" are being realized. Still, the benefits of new technologies have only reached a small number of people and information. There is a disparity due to literacy. Coincheck will continue to create better services so that everyone can feel closer to the "new value exchange" created by cryptocurrencies and blockchain and the transformation realized by the new technology that will appear next.

Introduction

Cryptocurrencies are digital cash designed to be faster, inexpensive and more reliable than our systematic government issued currency. Instead of trusting a government to create your money and banks to pile, send and receive it, users transact directly with each other and store their money themselves. Because when people can send money directly without a middleman, transactions are usually very affordable and fast.

To preclude scam and manipulation, every user of a cryptocurrency can simultaneously record and verify their own transactions and the transactions of everyone else. The digital transaction's recording make transactions efficient, permanent, secure and transparent.

With public records, cryptocurrencies don't require you trust a bank to hold your money. They don't require you trust the person you are doing business with to actually pay you. Instead, you can actually see the money being sent, received, verified, and recorded by thousands of people. This system requires no trust. This exceptional positive quality is known as "trustless".

Edox is a digital currency or cryptocurrency. It is owned and controlled by its users, peer to peer and has no central control like traditional currencies. Just like other cryptocurrencies, Edox coin offers an unmatched level of anonymity, both for transactions and users. It is enabled using a technology called Blockchain. Blockchain allows cryptocurrencies like Edox to function and enhances security. Blockchain was started by a mystery person (or people) named Satoshi Nakamoto as an open source technology.

Edox is operated by the popular company of Switzerland. The company pledges itself to create value for its clients as they strive to set new standards in the virtual currency industry. With the release of the Edox coin, its popularity is expected to increase exponentially, particularly among crypto enthusiasts.

Edox Coin Introduction

Edox is a digital currency or cryptocurrency. It is owned and controlled by its users, peer to peer and has no central control like traditional currencies. Just like other cryptocurrencies, Edox coin offers an unmatched level of anonymity, both for transactions and users. It is enabled using a technology called Blockchain. Blockchain allows cryptocurrencies like Edox to function and enhances security. Blockchain was started by a mystery person (or people) named Satoshi Nakamoto as an open source technology.

Edox is operated by the popular company of **Switzerland**. The company pledges itself to create value for its clients as they strive to set new standards in the virtual currency industry. With the release of the Edox coin, its popularity is expected to increase exponentially, particularly among crypto enthusiasts.

The Edox coin has many supportive features. It is a peer to peer platform with exchange name **Black Bit Mart** having the website as www.blackbitmart.com the BlackBit Mart Exchange offers a user-friendly interface where users can sell or buy any popular cryptocurrency, aided by P2P. P2P trading is the act of buying and selling cryptocurrencies directly between users, without a third party or intermediary.

Furthermore, **Black Bit Mart** charge very nominal fee for the transactions and the transactions executed through **Blackbitmart** are swift and speedy. Moreover, **Black Bit Mart** is going to expand its venture with introducing its own advertising platform which will return high profit margins to the investors that will be proved as a new edge in the industry.

Mission & Vision

blackbitmart.com was founded on the belief that everyone has control over their money, data, and identity. We believe that decentralization holds the key to empowering people around the world to safeguard their rights better. We are helping the world move in this direction by accelerating the transition to adopting cryptocurrency.

We want to own and develop assets in the **metaverse and energy** project as we believe these will be as valuable as real-world economies over time.

The **Crowdhelp community** harnesses the power of social networks and the internet to give people the means to raise funds, help others overcome hardship, and meet aspirational goals. We want to see this community helping people all over the world.

Team

Dorina Lavater (Marketing Officer)

7 years of entrepreneurship experience in emerging markets across supply chain management, e-commerce, technology development, investment advisory & corporate management.

Distribution

Roadmap

Phase 01

Project Planning, Research, Design
 Exchange Development Start
 Black Bit Mart Exchange Launch, Social Media Creation, & promotion Start
 Whitepaper 1.0 Version Release
 5000 Social Media Users
 Crowdfund Community Startup

Phase 03

Community Expansion
 Social Media User 100K
 IDO Start
 List Edox Coin in Pancake Swap Listing Exchange to CG
 5000 Investor For Metaverse Project
 Crowdfund Community Expansion

Phase 05

Launch Metaverse Beta Version
 Energy Project Planning Start
 Crowdfund Community Expansion

Phase 02

Community Expansion
 Airdrop Start in 3 Phases
 Exchange & Coin Coin Listing in Market Cap Listing
 2500 Token Holder
 Logo On Trust Wallet
 Raise Seed Funding
 Start Crowdfund for people Through Crowdfund

Phase 04

Community Expansion
 List Edox Coin To Another Exchange
 Metaverse Development Start
 5000 Investor For Energy Project
 Crowdfund Community Expansion

Metaverse Introduction

The metaverse is a massively scalable, persistent network of interconnected virtual worlds focused on real time interaction where people can work, socially interact, transact, play and even create. It uses advanced virtualization and technologies (AR, VR, Haptic Sensors, etc.) to fully immerse the user into the virtual world. This means that the user can interact live with a world that is always there, and he can always access whenever he wants.

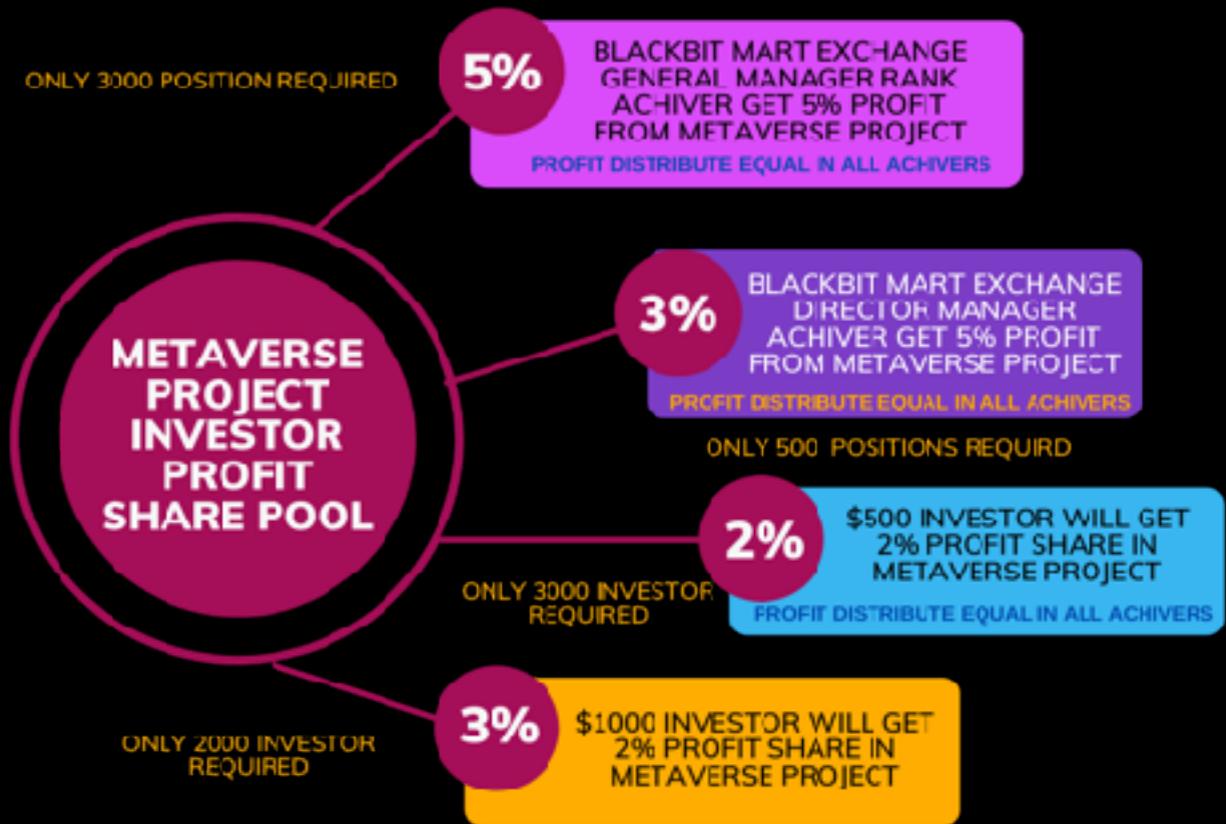

Many advocates believe that the perfect futuristic version of “The Metaverse” there would be one single platform where you have your persona, your identity and platform services connected under which many worlds get created where you can gain access. Like a world with many sub-worlds which you can join, leave or even create.

Important factors are still that there is a definition for a digital identity, digital ownership, digital currencies and the universal transferability of digital assets – Thus enabling a fully functioning economy in a virtual world.

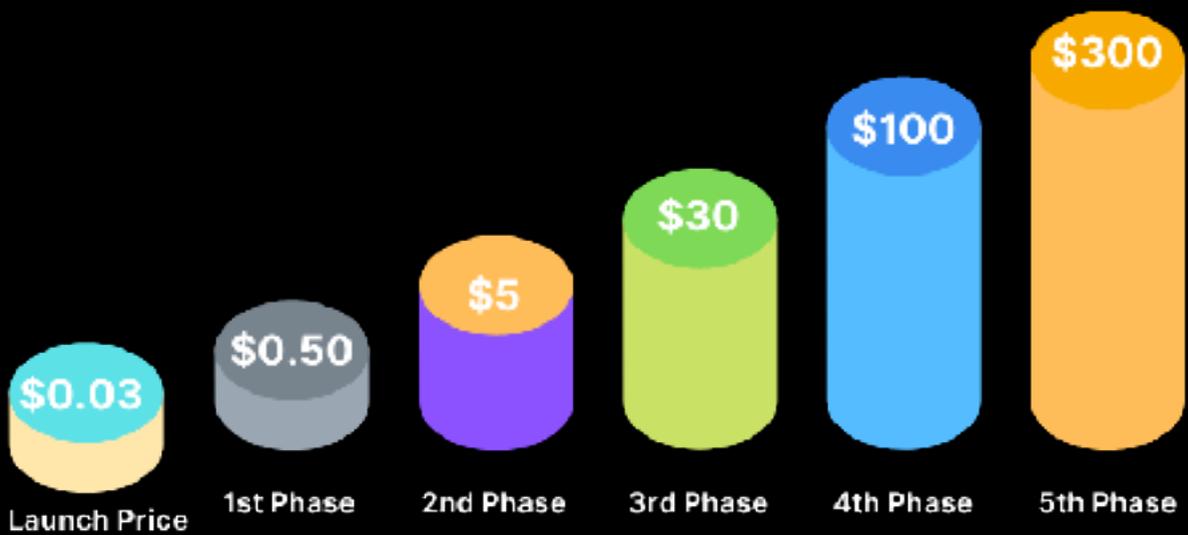

This way the metaverse could replace several aspects of how tourism works, what it means to go on a concert, how to discover art exhibitions but especially also how people learn, study, interact and even meet friends. The metaverse is a massively scalable, persistent network of interconnected virtual worlds focused on real time interaction where people can work, socially interact, transact, play and even create. It uses advanced virtualization and technologies (AR, VR, Haptic Sensors, etc.) to fully immerse the user into the virtual world. This means that the user can interact live with a world that is always there, and he can always access whenever he wants.

It's true that not all companies are going to accept metaverse as the future, but social media companies are effectively opening doors for metaverse. Many are now creating augmented reality and virtual reality devices to provide their clients with a sneak preview of what the metaverse would resemble in the future.
